

Hi, I'm Adam,

Thank you for the time reading my resume, I applied to the company believing that it has a bright future, I would like to talk about the current challenges, ideas for the company and a possibility of working together remotely or onsite for the better team and myself.

This resume could help the team visualize my experience of concepting, planning, delivering and maintenance as a full stack developer and hope that it would align to the company current challenges.

Looking forward to meet,

Adam Ramadhan

Adam Ramadhan, Full Stack Developer

Skype: masedem@gmail.com Telegram: +6281285450000

I have the technical capability to;

- Build a Software company
- Build a Fiber Internet Service Provider

Experience Details;

Freelancer (Starts at 2006-)

Starting my professional work around 18, doing freelance while taking a Bachelor's degree.

Highlighted Experience:

- ✓ Created own PHP and framework
(<https://github.com/adamramadhan/red>)
- ✓ Making own Implementation of Facebook's BigPipe in Python
<https://github.com/wamplo/athena>
<https://www.facebook.com/notes/facebook-engineering/bigpipe-pipelining-web-pages-for-high-performance/389414033919/>
- ✓ Created own CSS framework (TEN), failed as Bootstrap just launched
<https://github.com/netcoid/ten/blob/master/less/ten.base.less>
- ✓ Made an Indonesian Web Tutorial Blog for Friends
<https://web.archive.org/web/20090728230649/http://www.eattuts.com:80/html-xhtml-part-1>
- ✓ My First Bug Issue Confirmed on NPM with Issacs,
<https://imgur.com/a/WlzGQ>

Experience:

- ✓ Made a Social Ecommerce Startup (Partnership with MAXINDO Internet Provider)
- ✓ GitHub Indonesian Translator, made the first Indonesian GitHub Meetup, joining the group with Melissa & Tekkub in IRC pub back in the old days of GitHub <https://github.com/Indonesia>

- ✓ Initial Founder of Indonesian Nodejs Group & Elasticsearch Group as it was so few at the beginning of days. Now the group consists of more than 10k people. <https://www.facebook.com/groups/nodejsid/>
- ✓ Give education back to the opensource community (University & Community) giving talks about Git & GitHub <https://imgur.com/a/muejq>
- ✓ Made a News Blog with a friend, 300k Unique Visitor Monthly, sold it for around \$6K to a friend, that was a lot at that time. uniqpost.com
- ✓ Teacher for Internet Ambassador Indonesia 2017 <https://imgur.com/a/bSKXb>
- ✓ Git & GitHub for Ubuntu 2016 Anniversary with Head Ubuntu Indonesia Gary Dean <https://www.flickr.com/photos/forumubuntuindonesia/26809680660/>
- ✓ Joining as 1 of 2 practitioners on IID FGD Forum, in making of a National Internet Identity <https://imgur.com/a/aVJ2W>

Systec Ventures (2011-2014)

In 2011, was asked to join a seed fund venture capital (work straight under one of its directors and the owner of BINUS University, Mr. Laurence with Nicko Widjaja as CEO) becoming their technical person, since there is no technical department, I was recruited as an associate. Maintain various types of IT Assets and making sure that all the CTOs work through their job.

Highlighted Experience:

- ✓ Gaining more expertise in technical matters (Web Development, Desktop Development, Mobile Development) accepting freelance work when the startups can't get things done fast.
Managing IT Assets (domains, servers, etc.) worth around \$50K to \$80K and to lead weekly meeting with CTO's from Systec Portfolios

Experience:

PT TALKMEN MEDIA Online Media for Men's talkmen.com, PT SA INDONESIA Online Media for Automotive Enthusiasts speedarchitech.com, PT TOUCH MEDIA Mall Directory & Coupons Machine touch.co.id, PT AGENBAIK Coupon Company agenbaik.co.id, PT TINKER GAMES Mobile Game Company tinkerworlds.com, Platform Design Agency, PT TEKNOLOGI MITRA SOLUSI (TMS) Digital Customer Loyalty Company and Hypernet.

- ✓ Started the foundation development of their website (CodeIgniter PHP). find, train and monitor the technical team (talkmen & Speedarchitech)
- ✓ Solve disputes with the founder and Systec Ventures, where the domain holder is still on the founders (talkmen)
- ✓ Assist the CTO on technical problem on their first machine (Desktop Application) uses .NET, Java and some APIs for the remote Administration (touchpoint) <https://www.techinasia.com/touchpoint-installs-giant-iphonelike-displays-indonesian-mall-customers>
- ✓ Collaborate with design team, and make some Systec Ventures portfolios them their first website (tinkerworlds.com, e-tms.co.id, platform.id)

<https://www.techinasia.com/indonesia-jakarta-systec-group-venture-capital-wempy-dyocta-koto> (I do not work here anymore when Wempy joins systec)

PT WAMPLO SATU INTERTEKNOLOGI (Starts 2014-)

In 2014, My friend asks me to join a Software House startup, seeing the opportunity to first help Systec more with a team, so I decided to leave Systec. Growing with multiple clients and partners. Focusing on Web Hosting Business and the Software Business. <https://imgur.com/a/RwjxF>

Highlighted Experience:

- ✓ Created a Product <http://newsfeeding.id> News Aggregator, installed in a National Scale at the Ministry of Defense, University of Defense & Indonesian Navy <https://imgur.com/a/fM2FK>, Nodejs & Python for the Crawler, Laravel for the Backend, React, Bower Package Manager, for UI & UI management, Elasticsearch and Clustered MYSQL for the database. (demo available by request)
- ✓ Created a Hosting & Domain Division, WHM, WHMCS, PROXMOX, IDRAC, Custom Made Dashboard for Monitoring (<https://imgur.com/a/x4KO1>) currently holds 400 + 4000 hosting clients from Ministry of Communication, with VPS clients ranging Media, <https://www.slideshare.net/revolution/1-jt-domain-review-2016> 2017, 2018 Special Program. Setup Colocation, Attend Meetings, Buying Servers and Support Tools. registrasi.id and wamplo.com

Experience:

- ✓ Delivering the shortest URL and the most expensive domain in Indonesia, s.id proof in <http://home.s.id/wamplo.txt> use PostgreSQL, Bootstrap, Laravel, Redis
- ✓ Deliver the Internet Identity Program joint with Government & PANDI (.id main Registrar like Verisign for .com) <https://u.id/> use OAuth 2.0, MySQL, Laravel, Redis.
- ✓ Delivering the Design and Laravel App for Panin Bank Indonesia Securitas <http://pans.id>, Srilanka Embassy Indonesia <http://srilankaembassyjakarta.com/> (bad design but the client wants it this way), Indonesian Online marketplace <https://marketplays.id/> and other more like, <http://telenet.co.id>, <https://hexosindonesia.com/> most of them are just following the clients design.
- ✓ Delivering the Application for the Ministry of Communication Indonesia for <https://dnsnusantara.id/> (BIND9 server + Voting system in Laravel for whitelist domains) & API for .go.id domains for PANDI <http://domain.go.id>

Ps. I'm a Starwars fan since little <https://imgur.com/a/d8Dxi> (me on the middle, mom on the right), for more details please see my GitHub profile. Last updated on 16/02/2021
